Abdalghani Dakkak

FRONT-END DEVELOPER

WORK EXPERIENCE

INTERNSHIP FRONT-END DEVELOPER

Akwad - Syria — 11/2023

- I successfully converted four UI designs into fully functional and responsive web pages using HTML, CSS, JavaScript, and Bootstrap.

- Additionally, I implemented two UIs using React and Redux, which allowed me to deepen my understanding of state management and component-based architecture.

- Throughout the internship, I focused on writing cleaner, more maintainable code. I adopted best practices such as modularization, proper commenting, and consistent formatting.

- I developed a website featuring authentication mechanisms. This project involved implementing user registration, login, and secure access to certain features.

- One of my key goals was to improve the dynamic nature of my code. I focused on making the styles adaptable to future modifications, ensuring that changes could be made with minimal effort.

- I created a chat application using React, featuring two distinct themes. To manage the styling for these themes, I utilized "Styled Components," which allowed for seamless theming and easier style management.

EDUCATION

BACHELOR OF INFORMATION TECHNOLOGY

Al-Ba'ath University — 2022-2027

PERSONAL DETAILS

4594 – Fleming Way.
Flagstaff, AZ 23831

Tel: +963 992 528 376

abdalghanidakkak@gmail.com

PROFESSIONAL SKILLS

HTML, CSS, Bootstrap, Tailwind

JavaScript + ECMAScript6

React.js, Redux.js

Version Control

Problem Solving
